RE: Electro Purification Application to Bluebonnet Groundwater Conservation District

Dear Mr. Holland and Bluebonnet Groundwater Conservation District Directors:

I have concerns regarding the Application filed by Electro Purification LLC to drill 10 water wells in Waller and Austin Counties near the Fort Bend County line and produce up to 20,000,000 gallons per day of water.

I have spoken with three Fort Bend County Subsidence District (FBSD) Board Members, two of whom are professional engineers. They tell me that the Application and supporting study do not address, in depth, potential subsidence or impact on existing wells producing from the Evangeline aquifer in Fort Bend County. Also, I attended the Public Meeting in Austin County at which Bluebonnet's staff and consultants presented information about the Application where they acknowledged that no detailed studies on the impact of the well field on existing wells and on subsidence were prepared. Since the proposed well field is right on the county lines between Fort Bend and Waller and Austin Counties, the potential associated subsidence and impact on existing wells in Fort Bend County need to be addressed.

FBSD recently approved a Modeling Study of potential subsidence in the area of Fort Bend County that is near the proposed well field.

This Modeling Study could be utilized to analyze and forecast the long term effect of extracting such a large amount of groundwater.

I request that Bluebonnet's Board take into consideration the results of a Modeling Study on potential subsidence and of a study of the impact on existing water wells in Fort Bend County before making a final decision on the Application from Electro Purification LLC.

Please include this letter as public comment for consideration in determining disposition of the Application. Feel free to call me if you have any questions regarding this letter.

Sincerely

A handwritten signature in cursive script that reads "W.A. Meyers".

W. A. "Andy" Meyers, Commissioner
Fort Bend County Precinct 3
